Jerry L. McCarrell

Ephrata And Solanco To Launch '66 County Fair Season Next Week

This coming Tuesday and Wednesday the Fair season in Lancaster County will officially begin as first Ephrata, then Southern Lancaster County Community Fairs get underway.

4-H and FFA steer, hog, and dairy exhibiting will be the leading activities of interest to Lancaster County youngsters, and will serve as "practice sessions," in the case of 4-H Club steers, for county and state main events later in the season.

Steer showing will all be on Thursday — 2 p.m. at Solanco and 7 p.m at Ephrata.

Last year's champion at Solanco was a Hereford owned by Fred Linton, Jr, and shown by Kenneth Rutt Fnishing in the runnerup spot was an Angus shown by Kathy Weaver all were from Quarryville R2

(Continued on Page 6)

Three New Teachers Of Vo-Ag In County

Three new teachers recently began their duties in two of Lancaster County's nine high schools offering vocational agriculture programs.

At Solanco, Paul Bahner replaced Ralph Layman who moved into administration work. Bahner, a 1956 Penn State graduate, received his master's degree in agricultural education in 1962. He has taught vocational agriculture in Bucks County for the past two years He is married and has two children.

Also at Solanco, Jerry L McCarrell, a native of Washington, Pa, will replace William Fredd for one year Fredd is on leave until Sep-

SWCD Annual Meeting Date Set March 7th

Lancaster County Soil & Water Conservation District directors have set Tuesday, March 7, 1967 as the date for next year's annual banquet meeting The place is yet to to be determined

At their meeting Wednesday night at the Courthouse, directors also discussed names of several guest speakers for the annuel event, but reached no conclusions

In other business, vice chairman Henry Hackman reported on the recent Susquehanna River Basin meeting which he attended They were told at the meeting, Hackman said,

(Continued on Page 9)

County Poultry Assn. Announces Annual Tour

The Lancaster County Poultry Association has set Saturday, October 8, as the date for its annual tour, according to tour committee chairman Allen B Graybill

Buses will leave from the Agway Supply Center, 1027 Dillerville Road, Lancaster, he said, at 8 30 a m, and should return at approximately 5 p m.

Highlighting this year's trip, in addition to the autumn foliage, will be stops at a large cattle operation, lunch at Longwood Gardens — with drinks and ice cream available to supplement tourists' box lunches, and a view of an atomic power plant

The first stop will be at the Buck and Doe Run Farm in Chester County This farm is owned by King Ranch of Texas and has a spread of 6000 head of Santa Gertrudis cattle fattening on its 10,000 acres Farm manager Samuel Wilson will be on hand to show the group various parts of the operation, including cowboys and quarter horses

(Continued on Page 5)

Few Laurels To Countians At Week-Long Dairy Show

Although they were in there fighting in most of the main events, Lancaster County showmen were held to a few scattered hits in the highly competitive dairy show activities which took place at the Farm Show Building at Harrisburg all this week. The brightest spots came in the state junior dairy show on Monday, and in the state Black & White show on Tuesday

Esbenshade Scores For County Juniors; Wins Reserve Ayrshire Title

HARRISBURG — The only major win for Lancaster County 4-H and FFA showmen here Monday came in the Ayrshire division of the 11th annual Pennsylvania Junior Dairy Show.

James R Esbenshade, Quarryville R2, showed his senior calf, Unicorn Royal Queen, to the 4-H junior championship The Esbenshade calf was sired

(Continued on Page 4)

Stauffer Bull Repeats For Holstein Reserve Champion Title

A four-year-old Wis Captain son owned by Clarence Stauffer, Ephrata R1, was the only title winner exhibited by a Lancaster Countian at the Pennsylvania Black & White Dairy Show at Harrisburg Tuesday.

Sunny Craft Dean Captain, classification 90 (Ex), is a show ring veteran His performance this year, reserve senior and reserve grand champion, was a repeat of last year's Black & White Show for the Stauffer bull, and rep-

(Continued on Page 8)

Type 41 Tobacco Forecast Up 3%

Some timely rainfall in August has caused the state crop reporting service to slightly upgrade its August 1st estimate of this year's Pennsylvania Seedleaf crop

Expected yield per acre advanced by 50 pounds to a predicted level of 1700 pounds. This would be about 200 pounds per acre less than the reported average for last year's crop, and nearly 100 pounds below the 1960-64 average yield

If the current estimate of 42.5 million pounds materializes, production will be 17 percent less than last year's

The Mark of SEED QUALITY

Hoffman FARM SEEDS

...AND THE EXTRA CARE THAT PRODUCES BETTER PAYING CROPS!

Every step in the production of Hoffman wheat, barley and oats gets its share of painstaking attention . . . for each plays its part in producing higher-yielding, better-paying crops. Hoffman care is reflected in such things as hand-roguing, and trimming of edges of seed grain fields for weed control. It's evident in the exhaustive laboratory tests on the final product, and the careful handling it gets every step of the way.

It's our conviction — in seed production, everything is important!

Weekly Poultry Report

Eastern Pennsylvania And New Jersey
WEEKLY SUMMARY

LIVE HENS

Prices on light hens declined one cent under light trading activity. Movement slackened as some processors observe Hebrew holy day. Conversely, offerings were barely adequate as growers tended to hold flocks due to favorable egg market prices. Demand fair for heavy hens. Offerings were barely adequate with moderate shipments from outside areas noted. Prices paid at farm: Light hens 8-9, mostly 8-8½; Heavy hens 14½-16c.

TURKEYS

Offerings light on toms over 26#, ample on heavy hens & toms. Demand fair. Some processors experiencing difficulty in plant operations due to shortages of help. Prices at farm: Heavy hens 23-24½, mostly 23c, heavy toms 24# average 22c.

Fogelsville

September 13, 1966

Hens, light 8½-11½, mostly 9-9½; Hens, heavy 9-18½, mostly 10½-15; Pullets 9-30, mostly 25-30; Roasters 12-28, mostly 17-26; Turkeys, hens 28-30½; Rabbits 24½-37½, mostly 32-35; Guineas 50-70, mostly 50-52½; Pigeons (per pair) 40-120, mostly 47½-65; Jumbo Squabs 75-77½.

Total Coops Sold: 891.

Eastern Shore Exchange
WEEKLY SUMMARY

With Thursday's report not available at press time, the three-day market reflects a lot-average price on broilers and fryers of 15.54 cents per lb., a decline of 1-cent from last week's average.

Prices paid ranged from a high of 16.1 cents on Monday to a low of 15.1 cents on Wednesday.

Sales for the three days totaled 1,082,200 head, up nearly 100,000 head from last week's total.

Delmarva

September 15, 1966

Market weaker today. Live supplies ample for needs with sizes running heavier than desired in instances.

Ready-to-cook demand, ranged very slow to fair, due in part to distributors observing Jewish Holiday.

Estimated slaughter for today, 764,4000 head, down about 200,000 head from last Thursday.

From Where We Stand . . .

Late But Welcome

Hey, how about that rain! It may have been too late, but it sure tried not to be too little.

It was too late for many tobacco crops and for most of the northern Lancaster County corn crop, but pastures and hay fields should get a good boost. Also anyone who had his small grain in the ground before the storm should get some quick results.

Rainfall amounts reported around the county varied widely — Lititz Boro reported 2.85 inches; county agent M. M. Smith recorded 3.9 inches at his home in Lancaster. The Harrisburg-York area boasted over four inches. And some quarters labeled it the heaviest one-day downpour in more than a decade.

No, it may have been late, but it sure was welcome!

★ ★ ★ ★

What Others Are Saying

During the national airline strike, U. S Senator Frank J. Lausche (D. - Ohio) said: "I think the time is at hand when courage must be exercised by public officials. We cannot continue to tolerate sovereign power being exercised by labor unions in defiance of the rights of 190 million Americans. More than the isolated airline strike is involved. Involved is the message that goes out to the people of the nation as to whether government is supreme or whether labor leaders are supreme."

(NOTE: While we heartily agree with the Senator on the need to curb rampant labor union power, we hope the only choice for the American people does not truly lie between the two supremacies — government and labor. One tyranny is as bad as another, benevolent or not.)

* * * *

"For some time now the food-population problem has been discussed as though it were a problem of the future. It is not a problem of the future. It is here now . . . ," says Secretary of Agriculture, Orville L. Freeman.

(NOTE: We also agree with this statement, but we only wish the Secretary had realized that fact earlier when politicians were speaking so glibly of feeding the world while Administration forces were busy reducing the American farmers' ability to do so.)

● Junior Dairy

(Continued from Page 1)

by Glengarry Lloyd Royal, her dam is Unicorn Isabelle Esbenshade, the 19-year-old son of Mr and Mrs. Milton Esbenshade, also won awards in fitting and showmanship classes. He has been active in 4-H work for the past ten years. Esbenshade's calf also won the junior and reserve grand champion titles at the recent 4-H district show.

In last year's junior show, county youths dominated the Holstein classes, but were shut out in other breed competition. Three Conestoga FFA Chapter members — David Zimmerman, Clifford and Daryl Bollinger — won every Holstein title but grand champion and senior champion

County placings by breeds

Ayrshire: (4-H), Senior calf, junior champion, James Esbenshade, (FFA), none

Guernsey: (4-H), Intermediate calf, Allan Crider, 3, senior yearling, Mark Z. Witmer, 7, two-year-old cow, J Nelson Landis, 4; Marvin E Landis, 8. (FFA), none.

Holstein: (4-H), Junior calf, Marilyn Krantz, 15; intermediate calf, Marilyn Harbold, 4; Cindy Hess, 7; senior calf, Benjamin H. Kettering, 13; senior yearling, Carol Jean Kettering, 19, two-year old cow, Edwin E. Hess, 2 (FFA); Intermediate calf, Lester S. Gerhart, 7; senior calf, Earl Stauffer, 3; Daryl Bollinger, 5, junior yearling, Stauffer, 3; Randall Kline, 11; senior yearling, Linford L. Weaver, 6; three-year-old and over, David D. Zimmerman, 3.

Jersey: (4-H), Intermediate calf, Larry Aaron, 6; Shirley Aaron, 7; two-year-old, Stephen Arrowsmith, 4. (FFA), none.

Weather

Temperatures for the five-day period Monday through Wednesday are expected to average below the normal range of 55 to 77 degrees. Little day-to-day change is expected, but the weatherman looks for milder temperatures toward the end of the period.

Some general precipitation is indicated for Monday along the coastal areas. This will total ¼-½ inch and may reach inland to Lancaster County.

JAMES R ESBENSHADE, Quarryville R2, holds his senior calf, Unicorn Royal Queen Isabelle, that won junior champion Ayrshire 4-H honors at the Pennsylvania Junior Dairy Show on Monday. At right is Pennsylvania Dairy Princess Carol Ann Stephens.

● Tobacco

(Continued from Page 1)

51.3 million pounds, and 19 percent below the five-year average. It will be the smallest crop since 1957.

Late planted tobacco in the county is in much poorer shape than most of the older plants, the service reported, adding that the season had been pushed back several weeks later by the dry weather.

SEEDLEAF STOCKS DOWN 5 PERCENT

The crop reporting service noted also that unused Pennsylvania Seedleaf tobacco owned by dealers and manufacturers on July 1 amounted to 136 6 million pounds This is about 5 percent less than the 143 4 million pounds in warehouses on July 1, 1965, and 11 percent less than was on hand July 1, 1964.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

A Substitute For God

Lesson For September 18, 1966

Background Scripture: Deuteronomy 5,16-21; Proverbs 23 31 33, Hosea 4,11-13; 7,5 7, Luke 21 34 36 Ephesians 5 15 18.
Devotional Reading: Hosea 4 1 3, 6a, 11.

In his book, **Dare To Live Now!,*** Bruce Larson tells of an incident that happened one evening as a men's prayer group was meeting in a New York office. A man came in whom no one knew. Each man in the group assumed that the stranger had been invited by someone else in the circle. So they told him to pull up a chair and join the circle of men who were meeting for prayer and fellowship.

Rev. Althouse

(*Copyrighted 1965 by Zondervan Publishing House, Grand Rapids, Michigan.)

Several of the men talked about their present troubles and struggles toward becoming whole people and effective Christians. The stranger sat and listened in silence. Finally, the leader of the group turned to the stranger and asked him to introduce himself. The group was not prepared for what they heard him say.

"My name is Paul," he said, "and I am a dope addict." While they digested that revelation he went on: "I came here to rob this office to get a fix, but I think I have found something better." Because he had heard a small group of men being honest with each other about their Christian faith, Paul stayed to pray to God and ask him to help him with his problem.

Where God Should Be

This story points to a fact that we often miss: Alcohol and narcotics may be used as substitutes for God. Narcotics occupied a place in Paul's life that should be reserved for God alone. The same is often true of alcohol. It often becomes the means whereby people try to cope with their problems and the awesome realities of life.

Alcohol is often used by people as a stimulent, as a means of gaining inspiration. This, as the writer of Ephesians makes clear, is something for God's spirit alone. "And do not get drunk with wine, for that is debauchery; but be filled with the Spirit". (Ephesians 5:18 RSV)

Alcohol or narcotics may become a person's god and provide him with a way of life — or more precisely, of death. The Japanese have a proverb:

First the man . . . takes the drink.
Next the drink . . takes the drink.
Then the drink . . takes the man!

In short, it becomes a substitute for God, occupying the place in our lives that ought to be reserved for God alone.

Beyond Drunkeness

The moral issue of drink does not end with drunkeness alone. Drunkeness is harmful by itself, but it is even more significant when we consider how drunkeness may contribute to other moral failures. Drink may lead us to dishonor our father and mother, or it may be the cause of the loss of such honor before our own children It may cause us to take the life of another human being, accidentally or willfully. It may tear down our defenses against adultery or cause us to cheat, lie or steal. It may provide the one necessary ingredient to turn covetous thoughts into covetous actions. If a man takes the Lord's name in vain, it is often drink that loosens his tongue.

When drink becomes a substitute for God, we violate the commandment, "You shall have no other gods before me," and we stand in danger of violating all the rest as well. Alcoholism and Christianity are competing religions. Both are a total way of life. The real answer to alcoholism, then, is not a matter of hiding the bottle, but in finding and experiencing the power of God.

(Based on outlines copyrighted by the Division of Christian Education National Council of the Churches of Christ in the U S A Released by Community Press Service.)

For Full Market Reports Read LANCASTER FARMING

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Test Forage

The winter feeding season is approaching, it is considered good herd or flock management to know the feeding value of both the forage and the concentrates In many cases the value of the forage may be sufficient to permit lower cost of the grain feeds We recommend that both dairymen and other livestock producers invest the five dollars per sample charge to know exactly what is needed

To Use Good Boars

The swine industry has made progress in recent years by producing a more meat-type market hog In addition to this market requirement, it is important to obtain cheap rate of gain, good feed conversion, and top carcass quality. Fortunately, these traits can be selected for and a good boar can transmit these characteristics to his offspring. A herd-improving boar is seldom too expensive

To Fertilize Pastures

With improved moisture conditions nearly all types of pastures will respond rapidly in the next several weeks, if sufficient plant food is available If the grazing area has not been fertilized this summer, we'd suggest an application at once. A complete fertilizer for grass-legume pastures, and only nitrogen for straight grasses.

To Add Ground Limestone To Corn Silage

Cattle feeders have been exposed to this suggestion for several years and it continues to give good results. The application of 20 pounds of feeding grade high calcium limestone per ton of corn silage has resulted in increased gains and reduced feed per pound of gain. Limestone treated silage will be less acid, more palatible, and result in increased feed intake.

Seldomridge Gets 5th Term As ASCS Head

Thirty delegates attending the County Agricultural Stabilization & Conservation Service convention last Friday evening reelected Fred G. Seldomridge to his fifth consecutive term as chairman. The Gap R1 farmer has held that post since 1962.

Elmer L. Huber, Pequea R1, was reelected to a three-year term on the county committee, and was also named vice chairman for the coming year.

Alternates chosen by the convention were Frank Aument, Holtwood R1, first alternate; Robert G. Brubaker, Elizabethtown R3, second alternate.

John Herr, Mount Joy R1, elected last year to a two-year term, is the third member of the county committee.

Newly elected county and community committeemen will take office October 1.

● Poultry Assn.

(Continued from Page 1)

working cattle, Graybill said.

Following lunch at Longwood Gardens, the tour will wind up the west bank of the Susquehanna River to the Peach Bottom Atomic Power Station. The atomic center, operated by the Philadelphia Electric Company, deals with the constructive uses of atomic energy, Graybill said, adding that displays, motion pictures, and illustrated talks are presented in the auditorium

Bus fare of $2 per person will be collected at the bus, but reservations must be made by September 20. "These cannot be cancelled due to our bus commitment," the tour chairman states.

For reservations, those interested in taking this tour should call: Miller & Bushong, 392-2145; Hiestand, Inc, 426-1101; or, Mrs. Ethel McGarvey, 397-1543.

Approximately 200 Lancaster Countians enjoyed this popular poultry assn. tour last year.

U.S farm exports to Common Market countries are expected to be above $1 6 billion during fiscal 1966, according to the U S. Department of Agriculture's Foreign Agricultural Service data.

RUGGED P-A-G

SPECIAL CROSSES

Pure Single Crosses—SX 9, SX 9A, SX 9B
The "family" of 9's is designed to meet the special requirements of your farm. Good standability and blight tolerance. Well adapted to high population and recommended for narrow-row planting. Very reliable and consistent. Excellent combine corn.

Pure Single Cross, SX 29
Bred for the farmer who's willing to go all out for yields. Plant at populations from 16,000 to 24,000. Ideal for narrow-row. Has ability to use high fertility and available moisture. All characteristics are excellent!

Pure Single Cross, SX 31
Does best with high fertility and above average population. Exceptional seedling vigor for early cultivation. Blight tolerant. Short plant for efficient machine harvest. We recommend SX 31 for narrow-row planting.

New 3-Way Cross, P-A-G 399
This blend of inbreds rivals the best single crosses for yield. With populations up to 22,000 you can depend on excellent seedling vigor and good standability. You'll appreciate 399's easy harvesting.

Great 3-Way Cross, P-A-G 272
Dark green color, low ear placement, exceptional standability, and uniformity. It's remarkable at populations from 16,000 to 18,000. Good blight tolerance. Open husk for low moisture at picking.

See your P-A-G dealer for Special Crosses and a wide variety of Four-Way Crosses to match your grain and silage requirements. You *can* do better with P-A-G!

MILLER

SMALL GRAIN SUPREME 5 - 11 - 14

with Rheolite (R)

A quality fertilizer designed to help the grower achieve higher grain yields and make more profit. Miller's Small Grain Supreme offers the following extras:

1. Stronger straw to help prevent lodging.
2. More uniform crop with fuller kernels.
3. Crop will ripen more evenly.
4. Crop is in better condition for overwintering—less plants lost.
5. More nutrient value in the harvested crop.
6. Is a mineralized granular product.
7. Contains RHEOLITE(R) — Miller's organic fertilizer lubricant which insures free flowing qualities.

● Swine Assn.

(Continued from Page 1)

Lampeter Fair, said secretary James Z. Martin. To enter the carcass show, exhibitors must be members of the association: there will be a $1 entry fee, Martin said.

Carcasses will be judged by a University meat specialist on a basis of ham-loin percentage and meat quality. Trophies will be awarded to the grand and reserve champion exhibitors.

Martin stated that all entries must weigh between 190 and 220 pounds to be eligible to win, adding that animals outside that weight range will also be evaluated, though not considered when selecting the winner.

Producers are urged to have their entries at the swine tent on the fairgrounds by 5:30 p.m. on Thursday. Judging will begin at 6:30 p.m.

Those members wishing to enter are advised to mail the $1 fee to Martin at Christiana R1 no later than September 24 "This show is not only for purebred breeders; it is conducted for all swine breeders to get an 'inside view' of the swine they are producing, and to further develop the ability of producers to choose the type of animal on foot which will cut out the meatiest carcass," Martin emphasized

The on-foot evaluation contest to judge meatiness will be open to everyone Each participant's card will be scored against the official carcass data Cash prizes ranging from $10 to $2 50 will be awarded to the top four judges, Martin said

● County Fairs

(Continued from Page 1)

Defending champion at Ephrata will be Glenn Flickinger, Ephrata R3, who topped that show with an Angus. Reserve champ was another Angus exhibited by Sharon Weaver, New Holland R1

No hog show is scheduled for the Ephrata Fair, but at Solanco that event will immediately precede the steer show Last year, George Ewart of Peach Bottom R2 had the champion pair of hogs, with William Frey's entry taking reserve All FFA hogs and steers shown at Solanco will be consigned for sale at 2 p.m. on Friday.

The dairy show at Solanco is set for opening day, Wednesday, at 1 p.m. Last year Earl Wenger, Quarryville R1, and Ken Rutt finished one and two in the 25-head Holstein dairy show. Top Guernsey honors went to Earl Mull, Quarryville R1, and Larry Breneman, Strasburg R1, respectively. Jay Marvin Herr, Holtwood R1, and James Esbenshade, Quarryville R2, took the top titles in Jersey and Ayrshire competition.

The Ephrata Dairy show will be held Friday at 7 p.m. in the Ephrata Community Park.

Tractor-driving competition will be featured at 9 a.m. on Thursday at Solanco, and at 1:30 p.m., Saturday, at Ephrata.

Other perennial events at the two fairs will include corn and tobacco exhibits, poultry, fruits and vegetables, parades and queen coronations.

New **HIGH CAPACITY AUTOMATIC BUNK FEEDER**

GIANT CAPACITY

A powerful 9 inch auger is offset within a giant, fully enclosed 12-inch steel hood. This unique design provides a reservoir for silage and feeds the full length of the feeder, greatly increasing the capacity and speed with which feed moves to the livestock. Handles the output of the largest silo unloader with ease.

FEEDS ENTIRE HERD AT ONE TIME

Feed is augered the full length of the enclosed hood and is then automatically dumped into the feeding bunk, providing equal rations to each head of livestock *at the same time*. No cattle crowding. No spilled and wasted feeds. When feed is dumped, the hood closes automatically and repeats as often as needed.

SILENT, CLOG-PROOF OPERATION

Powerful 9-inch auger never touches the metal hood; eliminating metal-to-metal friction and providing the right clearance to prevent binding and clogging even when materials have high moisture content. Horsepower requirements are greatly reduced too.

LET US GIVE YOU COMPLETE DETAILS OF THE AMAZING VAN-DALE S-17 BUNK FEEDER

Feeders everywhere are talking about Ful-O-Pep Cattle-izer Beef Supplement

In feedlot after feedlot—commercial and farm—feeders are reporting better gains and conversions at lower feed cost.

The reason: It's Ful-O-Pep Cattle-izer Beef Supplement . . . designed to enable the beef animal to get up to 20% more energy from the same amount of feed . . . and to use that extra energy for faster, more efficient gains.

Gain, efficiency of gain, cost of gain, market value of cattle, and other factors are reflected in net return. And *net return*, cattlemen are reporting, is higher when Ful-O-Pep Cattle-izer Beef Supplement is fed.

EYES ARE FOR SEEING — Although students in vocational agriculture at Ephrata High School may not see any better with these 24 pairs of glasses, their chances of seeing longer are improved. These are safety glasses, which the state educational authorities say must be worn by all students while they are working in school shops. Vo-Ag instructor Lewis Ayers shows the practical and attractive case his classes made with sliding plastic doors to help keep the glasses clean and in place. L. F. Photo

What makes this little pellet your big milk producer?

First, Agway's Nu-Milkerpels 16 is 100% pelleted. This saves you time and labor, because the pellets flow freely in bulk bins and automated systems.

Full pelleting also allows Agway to use lower-cost (yet high milk-producing) ingredients than the ingredients which must be used in making a natural-textured feed. This lowers the cost per unit of energy or TDN in Nu-Milkerpels—which is reflected in its price to you.

Nu-Milkerpels contain urea as a protein source. Why? Urea makes high-quality protein quickly available in the cow's rumen. She makes more milk—and research indicates urea aids in the digestion of fiber in the ration.

Nu-Milkerpels use *lignin sulfate* as the pellet binder. This organic material, unlike the inert clay in many pellets, actually adds feeding value to the pellet—about $1 50 worth per ton.

Agway puts into this pellet everything that is known on the subject of how to make a dairy pellet profitable for you. Test this statement. Compare Nu-Milkerpels' 75 therms of milk-making energy, and its price, against the energy and price of your present dairy ration.

Then put these economic facts to work for you. Order Nu-Milkerpels 16. *Agway Inc.*

NEW HOLLAND — LANCASTER — QUARRYVILLE — HONEY BROOK

Black & White

(Continued from Page 1)

resented his fourth year of state competition. As a senior yearling he placed first in his class; as a two-year old, he stood third.

The senior and grand champion bull, Woodbourne Gorewood Reflector, was exhibited by Richard Frederick, Blair County.

For his grand champion female, judge John L. Morris, extension dairy specialist at the University of Maryland, went to York Countian George M. Knight's aged cow Pearl Ivanhoe Comet. The reserve senior and reserve grand champion female was also exhibited by a southeastern Pennsylvanian, Warren N. Hertzler, Dauphin County. She was Trudy Ivanhoe Reflection, a four-year-old Ivanhoe daughter.

Lancaster County entries scored for 14 placings in this 13th annual B & W Show.

In the junior heifer class, Robert Kauffman, Elizabethtown R1, placed third. In the intermediates, J. Mowery Frey, 401 Beaver Valley Pike, Lancaster, had first place; Lucinda K. Hess, Strasburg R1, eighth; and Richard H. Hess, Strasburg R1, 15th. Senior yearling placings went to Frey, eighth; Linford L. Weaver, Ephrata R1, ninth; and Mary Ellen Kettering, Lititz R3, 15th.

In the bull classes, Kauffman showed the second-place two-year-old, and Stauffer the second-place three-year-old and over (reserve grand champion).

In the two-year-old heifer class, Frey placed seventh, and Edwin E. Hess, Strasburg R1, ninth.

A sixth place and second best udder for three-year-old cow went to Frey; and in the four-year-old cow class, Frey placed eighth.

In the aged cow class, the veteran performer Oliverdale Inspiration Terry, owned jointly by Kauffman and J. Robert Hess of Strasburg, placed 16th. In discussing that 38-cow class, several bystanders rated it the "toughest class yet for Morris to judge". (The grand champion also came from that aged cow class.)

The 393-head Pennsylvania Black & White Show was rated by Penna. Holstein Assn. secretary William C. Nichol as about on a par for entries with the 1965 show.

Announcing the event Tuesday was Roger Emig, sales-manager for the Atlantic Breeders Cooperative.

Specialist Offers Suggestions And Cautions On Feeding Urea

Corn silage used for dairy feed requires higher protein levels in grain rations. With the higher prices for natural protein feeds, some dairymen are seeking other methods of meeting protein requirements, according to Dr. W. R. Hesseltine, extension dairy specialist at the University of Delaware. Some dairymen use urea, a synthetic source of nitrogen manufactured from ammonia and carbon dioxide, to raise the protein level of grain ration.

Urea, properly added to corn silage, enables the dairyman to feed a 16 percent protein ration rather than a 20 percent ration, he said. Hesseltine recommends ten pounds of urea for each ton of corn silage. Wagon loads should be carefully estimated so that the recommended amount of urea can be used. Distribute the urea for each load evenly on the top before unloading or meter the urea into the silage with a hopper as it enters the blower, he advises.

Use a premix to get proper distribution of the urea if there is any problem, Hesseltine said. Thoroughly mix the amount of urea needed for one load with an equal amount of a feed such as corn cob meal. This is then spread on the load or metered in as the silage is unloaded. The rate would now be 20 pounds per ton (10 pounds urea; 10 pounds corn cobs).

Some feed dealers may sell urea in a premix form. Dairymen using this premix should be careful to follow directions; to add 10 pounds of urea, it may be necessary to use 25 pounds of this material.

Ideal if used unwisely, Hesseltine cautions. Animals eating even a small amount of urea in its concentrated form will be extremely sick at the very least. They may take months to recover and some animals will probably die. Therefore, urea in the purchased form should be stored carefully so that animals are unable to get at it.

If urea is used on very mature silage, it will not ferment. The silage will have an ammonia flavor and may be refused by the cattle.

Soybeans and soybean silage should never be mixed with urea. Soybeans release the nitrogen in urea thus lowering its value. This is particularly true if the moisture level of the feed is high, according to Hesseltine.

Vo-Ag Teachers

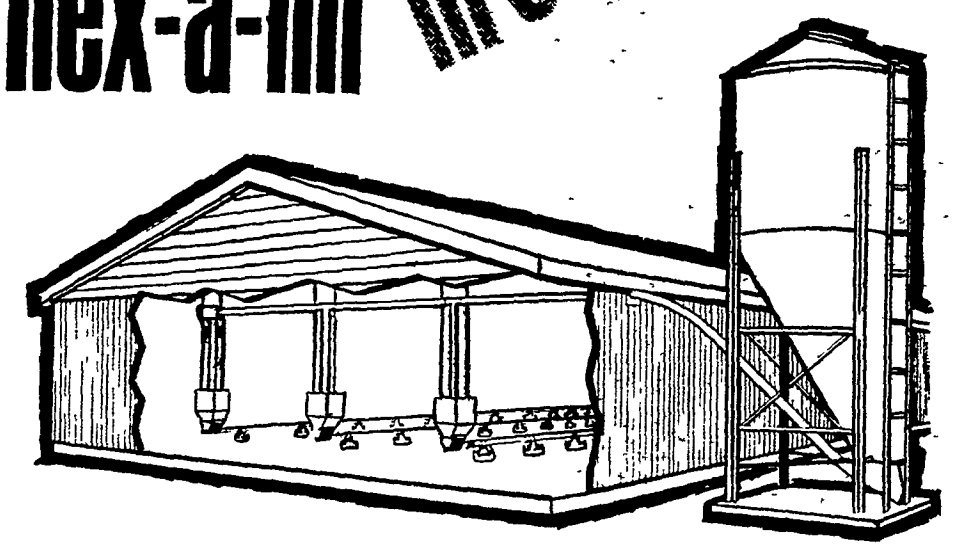
flex-a-fill moves feed up, down or around corners



climbs, turns, fills without "augering"

universal joints!

anderson feed bin fills easily, empties completely

This new flexible auger system operates without gears and from only one power source. Feed moves up, down or around 90 degree corners to locations over 100 feet away! Just put feed in bulk bin . . . system operates automatically only when needed . . . and there are no joints to clog up.

Auger system has very low horse-power requirement, yet operating at a standard speed of 312 rpm, it will deliver as much as 2400 lbs. of feed per hour!

Bin fills easily . . . empties completely. Fill it and forget it because its weather-tight construction assures content safety until the bin is empty. "All-Out" bottom empties completely, prevents bridging . . . no internal braces to jam contents and stop feed flow. Caulked seams, neoprene washers, heavy gauge galvanized steel give long rust-free life. Available in side and center-draw models.

More Total Digestible Nutrients in corn silage when treated with

SILO GUARD

Controlled Experiments have shown:

★ Six times more starches and sugars retained when SILO GUARD was used.
★ Silage with SILO GUARD had 0.22% Propionic acid (as compared to just traces in the untreated silage). This is why FERMENTATION CONTROL PROCESS silage does not mold or decay even after being exposed to air for some time when taken off the silo.
★ Vitamin A was present in just a trace in the untreated silage as compared to 21,000 units per ton in the treated. In this experiment the corn was cut in advanced dent stage when the Vitamin A content is usually very low.
★ SILO GUARD treated corn silage figured on a wet basis (as fed) has retained the most valuable nutrients that are in corn when freshly cut. Analysis of the untreated sample indicated that these nutrients are destroyed in the uncontrolled usual fermentation that takes place when corn is ensiled without the SILO GUARD Fermentation Control Process.

(Continued from Page 1)

that the river basin is not being used as it was intended in the original plan. A river basin "compact" among the states of Pennsylvania, Maryland, and New York, it was felt, was necessary if full potential of the basin is to be realized. As proposed, this compact would give equal administrative voice to each of the three states, although the bulk of the land lies in Pennsylvania. The compact will require approval of the state legislatures of each of the states involved, Hackman said.

In discussion which followed, the directors agreed that the federal government would have enough money invested in the project that it would not permit itself to be outvoted by any single party — this was relative to the common feeling that Pennsylvania should have the largest voice in the operation.

Director Aaron Zimmerman reported on the State Plowing Contest held August 26 in Mifflin County. Our county champion, Marvin Zimmerman of East Earl R1, came in second at the state meet, only eight points behind the winner, director Zimmerman said. He also reported the ground for the contour contest was very dry and came up in lumps. "It was a rough piece of ground to plow," the director said.

Chairman Amos Funk's four-year term as a director will expire January 1, 1967, it was announced. At that time it will be necessary for certain agricultural agencies in the county to reelect him or to nominate another county farmer for the County Commissioners' consideration. Funk has served on the board for fourteen years, and as chairman for thirteen of those years. The deadline for cooperating agencies to submit names to the Commissioners is November 1st, Funk said.

The new field representative for the State SWCD, Mac Hindman, was introduced to the group. Hindman replaces Boyd Kinsley who went to the State Conservation Commission in Wisconsin. Hindman, who began his duties August 3, now lives at Hershey. Working out of the Harrisburg office, he covers 15 southeastern Pennsylvania counties. Before joining the state conservation district, he managed a feed mill at Binghamton, New York.

In other business, the directors approved nine new cooperator plans for a total of 1998 acres

Potato Marketing Advisory Council Created For $20-Million Industry

HARRISBURG — The fifth marketing advisory council, representing the state's $20 million potato growing business, has been formed to work in cooperation with the Pennsylvania Department of Agriculture.

The council's role, Agriculture Secretary Leland H. Bull explained, is to plan and propose programs for improvement of the potato industry and for more effective marketing of Pennsylvania-grown potatoes.

"This is another step forward in bringing agricultural leaders and government together for a concerted effort to create a stronger market for Pennsylvania products," Secretary Bull said.

Other councils, all formed during the past three years, represent the state's apple, egg, poultry and nursery stock producers.

The potato council, at its organization meeting, adopted a four-point plan as the basis on which to prepare its program. Its attention initially will be directed toward the fields of grade standardization, education, promotion and research.

The 12-man council named Ivan Miller, Erie County, chairman; Don Freeman, Potter County, vice chairman, and Reid E. Wissler, of Ephrata R2, secretary.

Other members are. Byron Breisch, Schuylkill County: Edgar Gooderham, Cambria County; Lawrence Hinkler, Erie County; Irvin Hershey, York County; Burton Hetherington, Columbia County, Robert Jones and Charles Washko, both Northampton County, and Roy W. Wotring, Jr, Lehigh County.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

SANDWICHES, PLEASE..

SPENCE

Sandwiches appeal to a variety of persons in many different settings. Hungry youngsters like peanut butter sandwiches; grandfather relishes hot beef and gravy on his bread. Tearooms may serve dainty sandwiches on fine china, while another restaurant specializes in he-man offerings with generous fillings of beef, sausage, or barbecued meat.

Some form of sandwich may be found to suit any meat of the day . . . breakfast lunch, dinner.

Another thing to remember about sandwiches is that they are an excellent source of protein, when meat, fish, poultry, eggs, cheese or peanut butter serve as the sandwich filling.

Here are some sandwich meals that will be a delight to your family.

SAUSAGE-CHEESE STACK UPS

¾ cup mayonnaise or salad dressing
1 tablespoon prepared mustard
1 tablespoon catsup
12 slices whole wheat bread, toasted
6 slices summer sausage or bologna
6 green pepper rings
6 tomato slices
6 slices process American cheese

Blend together mayonnaise or salad dressing, mustard and catsup. Spread on toast slices. Cover summer sausage or bologna slices in order with green pepper rings, tomato slices and cheese slices. Broil in preheated broiler until cheese melts. Place on 6 spread toast slices. Close sandwiches with remaining toast, spread side down.

Serve with this: Soup, carrot curls, sweet pickle, fudge cake, beverage.

* * * *

TURKEY, LETTUCE AND TOMATO CLUB

12 slices white bread
6 slices whole wheat bread
Mayonnaise or salad dressing
6 slices cooked boneless turkey roast
6 onion slices
6 lettuce leaves
6 tomato slices

Spread all bread slices with mayonnaise or salad dressing. On each of 6 white slices, place turkey slice, then onion slice. Cover with whole wheat bread slice, spread side down. Spread with more mayonnaise or salad dressing. Cover with lettuce leaves, then tomato slices. Close sandwiches with remaining bread, spread side down. Fasten with wooden picks and cut diagonally into quarters.

Serve with: apricot nectar, French-fried onion rings, buttered green beans, raisin-filled baked apples, beverage.

* * * *

DEVILED HAM AND CHEESE

1 can (4½-oz.) deviled ham
1 cup shredded process American cheese
4 hard-cooked eggs, chopped
¼ cup catsup
8 enriched sesame seed hamburger buns, split
Butter or margarine, softened
Lettuce leaves, if desired

Blend together ham, cheese, eggs and catsup. Spread top and bottom halves of buns with butter or margarine. Spread ham mixture on bottom halves of buns. (Cover with lettuce leaves, if served cold.) Close sandwiches. To serve warm, omit lettuce leaves and wrap sandwiches in aluminum foil. Heat in preheated 350 degree oven 10 minutes, or until cheese melts. To freeze: omit lettuce and wrap sandwiches in aluminum foil. Fasten with freezer tape and label stating filling used and date. Freeze up to 2 weeks. To heat, remove sandwiches from freezer and place in preheated 350 degree oven. 20 to 25 minutes, or until thoroughly heated. Serve immediately.

Serve with: celery hearts, black olives, fresh peaches, gingerbread squares, beverage.

* * * *

WHEATY-BEEF BURGERS

1 pound ground beef
½ cup rolled wheat
1 medium onion, chopped
1 teaspoon salt
¼ teaspoon pepper
6 hamburger buns, split and toasted
Mayonnaise or salad dressing

Thoroughly mix together beef, rolled wheat, onion, salt and pepper. Shape into 6 patties. Grill on preheated grill or skillet or broil in preheated broiler to desired doneness. Meanwhile, spread top and bottom halves of hamburger buns with mayonnaise or salad dressing. Place patties on bottom halves of buns. Close sandwiches and serve hot.

FULTON GRANGE ELECTS NEW OFFICERS

Fulton Grange #66 held its regular meeting September 12 at the hall in Oakryn. Gyles Brown was in charge of the business meeting when the following officers were elected. They will be installed at the October 10th meeting.

Master, Clifford Holloway; Overseer, Chester Todd; Lecturer, Agnes Spence; Steward, Richard Holloway; Assistant Steward, Stanley Stauffer; Chaplain, John Galbreath; Treasurer, Clair Murphy; Secretary, Laura McSparran; Gatekeeper, Earl Smoker; Ceres, Carole Holloway; Pomona, Marian Holloway; Flora, Anna Giffing.

Lady Assistant Steward, Dorothy Stauffer; Pianist, Adaline Edwards; Librarian, Susan Fite; Flower Committee, Mary Giffing and Anna Armstrong; Purchasing Agent, Charles McSparran; Executive Committee, Philip Giffing; Finance Committee, Charles Long; Junior Grange Matron, Mildred Tindall; Hospitalization Sec., Charlotte McSparran; Trustees, Robert McSparran and Theodore Beck; Scout Representative, Charles Tindall.

Plans were made to take a tour of the Muddy Run project September 18. Clifford Holloway, Jr. has secured a bus which will leave the Penn Hill Meeting House at 1:30 p.m.

The public is invited to attend a Booster Night covered dish supper and program Monday, Sept. 26, 7:30 p.m. at the Grange hall. Twenty-five-year members will be honored, and a fashion show will be put on by Little Britain and Fulton 4-H clubs. There will also be special musical numbers.

FARM WOMEN NO. 14 TOURS PENN DAIRIES

Farm Women Society Group 14 met Wednesday at Penn Dairies, Inc., Lancaster.

Thirty-three members responded to roll call with "How I Spent My Vacation."

The group saw a film and toured the dairy plant.

Hostesses for the meeting were: Mrs. Paul Long necker, Mrs. Harold Byers, Mrs. Mervin Denlinger, and Mrs. Ross Leaman.

The next meeting will be held at the home of Mrs. Aaron Shirk at which time the Group will hold its annual food sale.

For The Farm Wife

(Continued from Page 10)

Serve with: corn chips, cabbage-carrot slaw, watermelon rounds, cherry buns, beverage.

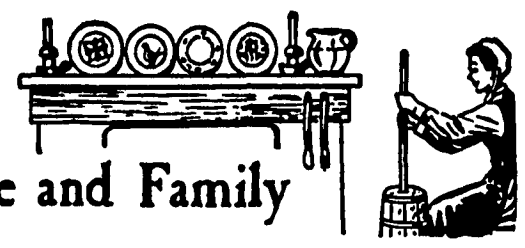
* * * *

CORNED BEEF OPEN FACE

1 can (12-oz.) corned beef, flaked
⅓ cup chopped dill pickles
¼ cup chopped green onion
½ cup mayonnaise or salad dressing
¼ cup catsup
2 tablespoons prepared mustard
6 hot dog buns, split and toasted

Thoroughly mix together corned beef, pickles, celery and green onions. Blend in mayonnaise or salad dressing. Blend together catsup and mustard. Spread on top and bottom halves of buns. Spread corned beef mixture on top and bottoms of buns. Serve open-face.

Serve with: strawberry fruit cup, green beans, almondine, cucumber-onion ring salad, chocolate sundae, sugar cookies, iced tea.



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

Keeping Family Business Papers

It's good business to know what family records you need to keep; where to keep them, and why.

All tax returns (income, real estate, personal property, federal, state, and local) should be kept at least six years.

Bank statements, deposit slips, check stubs, and cancelled checks should be kept at least three years. If you use them as evidence in tax deductions, you must keep them six years.

About Color In Food

Resist the temptation to add "bottled" color to foods. Instead, try to retain natural color in food by skillful cooking and combining less colorful foods with those that have high color.

Never overcook foods . . you'll dull their taste and color

To preserve color in soups, scum while heating and cook uncovered.

Boiled meats, if light, maintain better color if scummed.

If dark, their color will be improved by browning; greasing during roasting or broiling; or by glazing

Before pan-frying or grilling fish or other light meats, dust with paprika.

Breads and pastries develop good color by being butter-brushed before baking, or by glazing with egg or coating with sugar.

Some sauces may benefit from addition of egg yolks, saffron, meat glaze, mushrooms, and browned flour.

You can combine light and dark salad greens for a more interesting salad

What A BARGAIN!

You get them all for pennies a week when you put your valuables in a safe deposit box in our bank.

You know where they are — and only YOU have access to them.

Area Holstein Tops Cow Sale

HARRISBURG — A five-year-one Rosafe Citation R daughter consigned by J. Robert Hess, Strasburg R1, and W. L. Dickenson of Cullen, Va., was sold for $2650 here Monday night. This was the highest price paid at the Holstein auction.

The animal, Bachlea Ridge Citation Silver, out of Reebob Rag Apple Silver, was purchased by Lyle M. Horne, Crawford County who outbid contenders from four other states.

The more than 500 persons attending the sale bid in the 38 animals offered for a total of $32,810, an average of $863 per head. This was the highest average for the past three years for this sale, topping last year's sale by $155.

Second highest price of the sale, $1,400, was paid for a bull calf born last November. The animal, Wesholme Rag Apple Marq, was sired by Romandale Reflection Marquis. The dam is East Knob Mona Pledge. The calf was consigned by Wesley and Ruth Baxter, of Fredonia, Mercer County, and was purchased by John M. Umble, of Atglen

Third was a three-year-old cow, Fountain Farm Ivy Dewdrop, that brought $1,250 It was consigned by John C. Thompson, of Newtown, Bucks County, and was purchased by B and S Gunzenhauser, of Cortland, N Y The animal was sired by Osborndale Ivanhoe; the dam is Fountain Farm RH Dewdrop

Seven of the 38 animals went to out-of-state buyers Three go to New York, two to New Jersey, and one each to Virginia and Rhode Island All were consigned by Pennsylvanians

Lancaster County and area breeders buying animals included John M Umble, Atglen, Charles Myers, Lancaster, Paul Zimmerman, Ephrata, Harold M Shenk, Manheim, Albert E Fry, Manheim; Ernest J Sauder, Lancaster, John S Yost, Kinzer; Herbert and Rhelda Royer, Lancaster, and Carl L Martin, Ephrata

County and area consignors included Robert C Groff, Quarryville, Robert H Kauffman, Elizabethtown, Henry Kettering, Lititz, John E Kreider, Lancaster; John Metzler, Christiana, R John Yost, Narvon; Andrew D Stoltzfus, Elverson, Elam Stoltzfus, Narvon, Nathan Stoltzfus, Elverson, Vernon Umble, Christiana, John M Umble, Atglen; and J Robert Hess, Strasburg

Grimes Poultry Firm Plans Major Expansion

The Grimes Poultry Processing Corporation, Fredericksburg, has started the first phase of a major facility expansion and improvement program, according to plant general manager A. E. Bailey.

The program is designed to increase the plant's productive capacity from 4,800 chickens per hour to 6,000 The capacity of the cutup poultry department will be doubled, Bailey said

A new wet storage area will provide for one full day's production of ice-packed chicken

In the second phase of the expansion, the poultry company will install new ice manufacturing equipment with a daily capacity of 80 tons plus new ice storage facilities

The design of the new facilities will provide for future expansion of processing areas, blast freezing, cooler and freezer storage, to accommodate 12,000 birds per hour, Bailey said.

Grimes Poultry is marketed through distributors in a five-state area, and is jointly owned by two area feed companies, Miller & Bushong, Inc., Rohrerstown, and D. E. Horn & Company, York.

Local A-C Dealer Honored By Company

Anthony Grumelli, owner of Grumelli Farm Service, Quarryville, and a dealer for the Allis-Chalmer Company, was named dealer of the month at a banquet held recently at the Plain & Fancy Farm Restaurant, Bird-in-Hand.

Grumelli was presented with a plaque M. R. Winder, A-C Harrisburg branch manager.

Also attending the banquet were A-C sales manager Robert Carr, and J. Paul Martin, A-C district representative.

● Milk Flavors

(Continued from Page 16)

rations supplemented with vitamin E.

In future research, King hopes to find a means of overcoming the flavor instability of milk from cows on dry-lot feeding without resorting to diet supplementation. One practical approach is the possibility of drying feeds in such a way that more vitamin E is preserved. In more basic research, he is studying the metabolism of the vitamin in cows and the level of copper that can be tolerated by a cow without making the milk naturally susceptible to oxidized flavor development.

The total-electric home of Mr. and Mrs. Roy Lehman, Mt. Joy

We asked the Roy Lehmans:

Is total electric living as low-cost as we promised?

Their answer:

Yes! We paid just $29.60 a month last year for everything, *including* electric heating!

This low cost also included electric water heating, cooking, laundering, lighting, and all their other electric services.

That's why we say, to make a true comparison of the total costs of home heat and operating all your work-saving appliances, you must add together *all* costs.

With total electric living, for instance, there's just one service, one bill and no expensive maintenance contracts. But to get the true cost of flame-type heat, you must add together the fuel bill, the electric bill and the service contract. Put them all together and you'll see why we say live the total electric way as the Lehmans do.

IF YOU ARE BUILDING — be sure to tell your builder you want to be modern, you want the best, you want electric heat.

IF YOU ARE REMODELING — call a Reddy Kilowatt Recommended Electric Home Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."

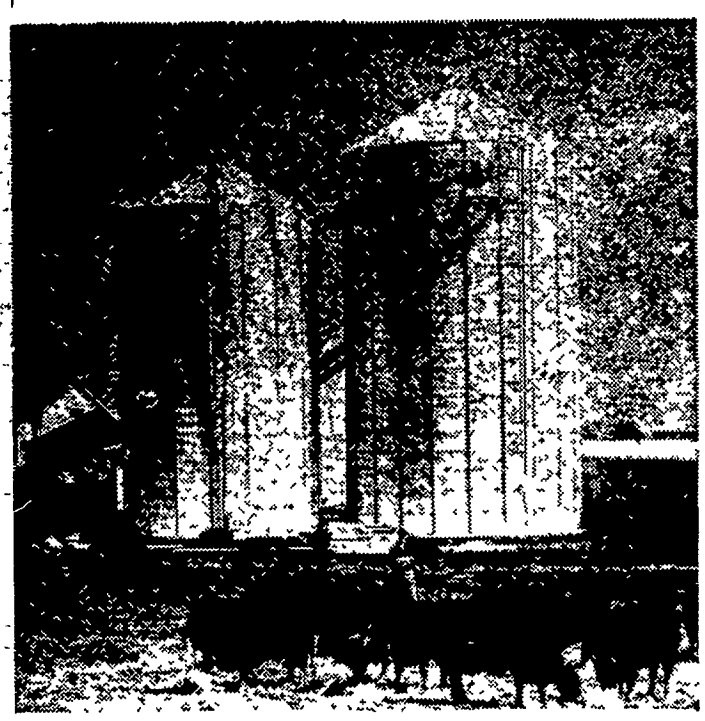
Reduce Crop Losses!



Feeders, Dairymen! Sealed Storage Can Help You Do It!

Don't let hot, dry weather cut you completely out of your corn crop profits! An investment in Butler sealed storage can save the day!

If you normally expect a yield of 100 bushels per acre—and dry weather cuts this yield in half—your 50-bushel crop, cut as silage and stored in a Butler Stor-N-Feed unit, will produce as many pounds of beef or pounds of milk as your 100-bushel yield, when harvested as grain. It also will pay you to investigate late forage crops such as sudan hybrids. Put up as low moisture silage, the nutrient yield per acre is very attractive.

See us today for details on a proven Butler Stor-N-Feed system... big capacities, fast discharge rate, mechanically reliable—and priced thousands of dollars less than some systems. Low-cost "Pay-As-You-Grow" financing readily available!

WEEDS ROB

Pigweed, Lambsquarter, Ragweed, Smartweed, and even Crabgrass use more plant food than corn, according to extension agronomists. For example, these weeds contain twice as much nitrogen, 3½ times as much potassium, 1½ times as much phosphorus, 7½ times as much calcium, and over three times as much magnesium as corn.

No wonder weeds account for nearly one-half of all crop losses — $7.7 billion — due to "pests."

PUBLIC SALE

STRASBURG TOWNSHIP FARM

P. B. GUERNSEY NIGHT SALE
Thurs., Sept. 22nd — 7:30 P.M.
At the Ass'n. Sales Pavilion, 6 Mi. E. of Lancaster, Pa.
60 Head — 1 Bull — Balance Cows & Bred Heifers
(All Fresh or heavy in Calf)
T. B. & Bangs Cert. Vacc.

We are fortunate to be able to offer top consignments from well known Guernsey establishments in Pa., New York, Md., New Jersey, and Delaware.

Fieldmen of the Ass'n. personally selected most of these and restricted the choice to the kind the consignor hated to see leave the farm, but would appeal to the buyer.

With increased milk prices, the smart man will take a sharp look at his own production potential and capacity with the thought in mind that he can strengthen his income materially by buying in this sale from an extremely fine selection.

The majority are young cattle with good records themselves, or on their dams and granddams.

Panel To Discuss Wire-Rearing Of Pullets At NEPPCO Show

A discussion by two large-scale eastern producers on the advantages of using wire-rearod pullets as cage layer replacements will be one of the features of the 29th annual Northeastern Poultry Producers Council (NEPPCO) Exposition in the Farm Show Building here October 4-5-6.

Norman Hecht, who raises a million pullets in cages at Walden, N.Y., and James Shubin, owner of the Kistler Hatchery in New Tripoli, Pa., will explore the benefits of wire-rearing pullets

Proponents of the wire-rearing method claim it produces more uniform birds better suited to cage production; virtually wipes out coccidiosis, blackhead and enteritis, and reduces costs, improves labor efficiency and increases capacity

Hecht was one of the first producers in the northeast to use the wire method of rearing pullets on a large scale Shubin is a former Californian who developed his system of wire rearing while serving as manager of the Olson Brothers White Wing Egg Farm at Quakertown, Pa

Their discussion will be moderated and illustrated by Fred Pate, eastern regional manager of Kimber Farms, who collected a large number of color slides on the subject while working with wire-reared pullets on the West Coast and in the Northeast.

Scientist Finds Vitamin E Aids Milk Flavor

Cows fed in dry lots will produce milk of much better flavor stability if their rations are supplemented with vitamin E (tocopherol), reports a University of Maryland scientist working under a U.S. Department of Agriculture research grant.

Dr Raymond L King, professor of agricultural chemistry at the university, has evidence that a vitamin E deficiency in cows not on pasture is the reason their milk often has an undesirable, oxidized flavor He has completed the first year of work under a 4-year grant from USDA's Agricultural Research Service.

Oxidized flavor in milk has been described as cardboard like, tallowy, or painty, depending upon its intensity. It develops as a result of any contact of the milk with copper. Although such contact is carefully avoided during processing, even the copper naturally present in the milk may be enough to impart this objectionable off-flavor.

Dairy rations produced by at least one large feed manufacturer are now fortified with vitamin E.

King's studies indicate that supplementing the diet with 1 or 2 grams of the vitamin per cow per day should overcome oxidized flavor in the milk. In view of the extra cost, the scientist recommends that vitamin E be added to the ration only where this flavor instability is a problem.

For his study of the effect of dry-lot feeding on milk flavors, King maintains a 22-cow herd on a basic ration of alfalfa hay and grain concentrate. Noting that cows on this ration produced milk with an exceptionally low content of vitamin E, a natural antioxidant, he added various amounts of tocopherol acetate to their diet for a few weeks, and then withdrew the supplement. He showed that the amount of the vitamin fed to the cows was related to the amount later found in the milk.

To determine the flavor stability of the milk, he added to it 1/10 part per million of copper at the time of milking; then two days later he tested the milk for oxidized flavor both chemically and by test panel. The oxidized flavor disappeared from the milk three or four days after beginning daily supplementation of the cow's diet with vitamin E. But eight to ten days after discontinuing supplementation, flavor instability returned.

Results were similar when the cows were allowed to graze on bromegrass or to feed on green chopped alfalfa, intead of feeding on dry
